

MESSAGE FROM THE PRESIDENT: Well, Winter continues with a vengeance. Sunday's weather gave us all a little burst of hope for Spring, but then we woke to more cold and wind and snow on Monday. I know we'd all like to see this ice melt, just slowly enough to not flood our basements though !

We are working on some speakers for upcoming meetings. If you have any ideas, please let us know.

Shari Burns

TRIPS: ESTHER MICELI 393-7200 or 721-4171 OR THELMA GOETTSCH 396-2700

Easter information:

Easter is always the 1st Sunday after the 1st full moon after the Spring Equinox (which is March 20). This dating of Easter is based on the lunar calendar that Hebrew people used to identify Passover, which is why it moves around on our Roman calendar.

Found out a couple of things you might be interested in! Based on the above, Easter can actually be one day earlier (March 22) but that is pretty rare.

Here's the interesting info. This year is the earliest Easter any of us will ever see the rest of our lives! And only the most elderly of our population have ever seen it this early (95 years old or above!). And none of us have ever, or will ever, see it a day earlier!

Here's the facts:

- 1) The next time Easter will be this early (March 23) will be the year 2228 (220 years from now). The last time it was this early was 1913 (so if you're 95 or older, you are the only ones that were around for that!).
- 2) The next time it will be a day earlier, March 22, will be in the year 2285 (277 years from now). The last time it was on March 22 was 1818. So, no one alive today has or will ever see it any earlier than this year!
- 3). Just hope that you are still around next month or you will miss the event of your lifetime.
